

Diagram of SPS-5 v8 Paging System with Enterprise Messaging and Alert Utility Software and Nurse Call

Computer with Alert Utility and Enterprise Messaging Server Software Installed.

“Desktop” Computer

Ethernet LAN

LOOP

AU OUT AU IN EM OUT AU IN AU IN

Qty. 5 RS-232 Serial DB-9 Com Ports

Brief Description:

Nurse Call Output comes into the Computer “IN” com ports to AU. Enterprise Messaging goes “OUT” one com port and back “IN” another com port to AU. Alert Utility Monitors all “Input” com ports and Routes all inputs out to the SPS-5 v8 Paging System.

All “Client” Computers or Client Browsers connect to the “IP Address” of the “Server” Computer via the Network (LAN).

Enterprise Messaging Software is a Server/Client Software Package. But does **NOT** work on a real Server Model Computer and is **NOT** Supported on one.

Legend:

AU = Alert Utility
EM = Enterprise Messaging

NOTE:

Use **ONLY** a Standard “Desktop” Computer with Win XP, XP Pro or Vista Premium OS.
