P/N= 0212-0003 For Unlimited Clients
P/N= 0212-0004 For 3 Concurrent Clients

WaveWare Enterprise Messaging Software is a Server/Client Package that allows you to Enhance your Operational Productivity by allowing you to Deliver Messages from your Desktop PC to On-Site Pagers, Wide Area Service Pagers and Internet Email using Windows Client and / or Internet Browser.

< Enterprise Messaging Main Server Screen:

Features Include:

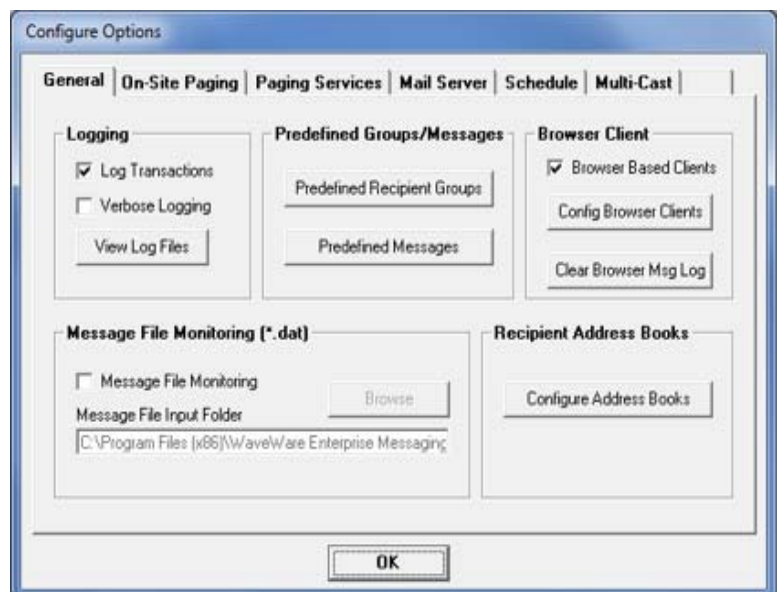

- Display Logging of Events in Real Time
- Configuring of Options and Features
- Configuring of Recipients and Groups
- Displays the IP Address of the Server Desktop

Configure Server Options Screen: >

Configurations Include:

- **General:** Logging, Recipient Address Books, Browser Client and Predefined Groups / Messages
- **On-Site Paging:** Setup the Paging System, Control Protocol, Local Paging Control and Supervise Paging
- **Paging Services:** Type (SNPP) and Host Name
- **Mail Server:** Configure / Test SMTP Host
- **Schedule:** Setup Times for Sending Messages
- **Multi-Cast:** Configure Device Servers

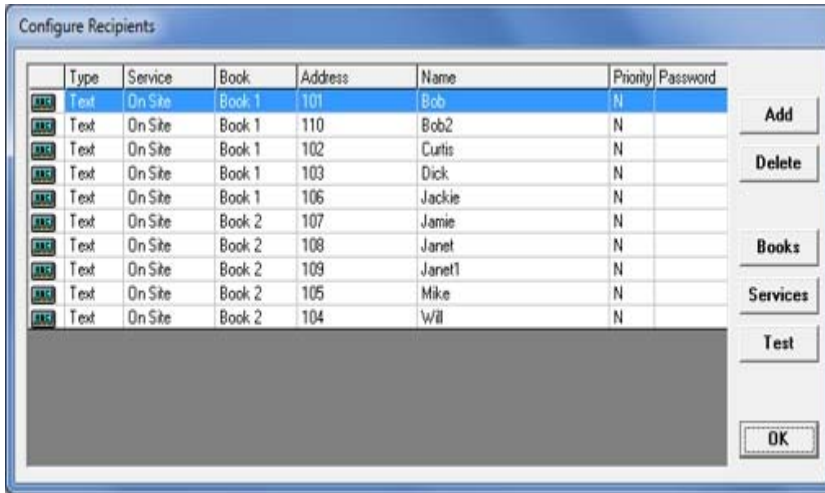

The Email Output Capabilities of the Enterprise Messaging Software uses SMTP Protocol to Internet Mail Servers. Email Output can be Configured to Include the Message in the Subject Line or Body of the Email. You can Combine Paging Output with Email Output. The Wide Area Pager Output Capability uses the SNPP Protocol to Communicate to Paging Carriers.

 - Start up in Hospitality Mode (Alt-N)

Address Books can be Configured to Provide a Filtered View of the Master Recipient List.

Enterprise Messaging Software

Send Custom Alphanumeric Text Messages to Pagers from your Desktop PC

WaveWare Enterprise Client Performs Supervised Messaging with the Enterprise Messaging Server using Internet Protocols and allowing Client users to be Informed of Server Failures and/or Paging System Failures.

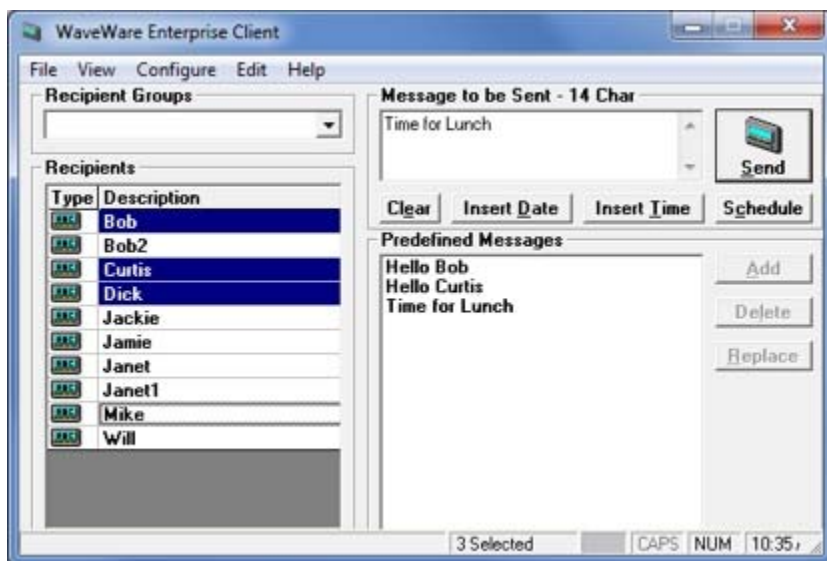

WaveWare Enterprise Messaging Server Application Requires a Registration/Activation Key to allow it to become Fully Functional. The Enterprise Client Application doesn't Require a Key. To use the SMTP, Requires an Activation Key / Purchase.

WaveWare Enterprise Client doesn't Require a Logon. You can install as many Clients as the Operating System allows.

Enterprise Main Client Screen: >

Client Features Include:

- Create Messages to Send
- Save / Store Messages for Future Use
- Delete or Edit Existing Messages
- Insert the Date and or Time into a Message
- Add the Date or Time either Before or After the Message you Create
- Schedule Messages to be Sent at a Later Time
- Choose to use the Master Recipient List or Choose from a Recipient Group
- Choose One or More Recipients
- Using Hospitality Mode, Ability to Change Reference (Name) for any Pager ID Number (Hospitality Mode Screen Not Shown Here)

< Web Browser Client Screen:

Browser Features Include:

- Create Messages to Send
- Use Pre-Defined Messages from the Server
- Insert the Date and or Time into a Message
- Use the Pre-Defined Recipient List from the Server
